Company Profile

Graham is a global business that designs, manufactures and sells critical equipment for the energy, defense and chemical/petrochemical industries. Energy markets include oil refining, cogeneration, nuclear and alternative power. For the defense industry, the Company's equipment is used in nuclear propulsion power systems for the U.S. Navy. Graham's global brand is built upon our world-renowned engineering expertise in vacuum and heat transfer technology, responsive and flexible service, and unsurpassed quality.

Graham designs and manufactures custom-engineered ejectors, vacuum pumping systems, surface condensers and vacuum systems. The Company is also a leading nuclear code accredited fabrication and specialty machining company. Sold either as components or complete system solutions, the principal markets for the Company's equipment include:

- Oil and Gas Refining
- Nuclear Power Generation
- Chemical/Petrochemical
- U.S. Defense and Other Power Generation

Graham equipment can also be found in diverse product applications, such as:

- Refrigeration
- Pharmaceutical
- HVAC
- Water Heating
- Pulp and Paper
- Desalination
- Metal Refining
- Processing
- Alternative Energy

For nearly 80 years, Graham has built a reputation for top quality, reliable products, and high standards of customer service. Its equipment is installed in facilities from North and South America to Europe, Asia, Africa, and the Middle East.

Graham Vision and Strategy

Graham's goal is to be a world-class leader in the design and manufacture of engineered-to-order products for the energy markets with a goal to double organic revenue to exceed \$200 million in revenue in the near term:

- Leveraging capacity to capture market share
- Expanding predictable base business including nuclear market MRO, U.S. Navy, aftermarket and short-cycle products
- Acquiring engineered-to-order product companies to expand geographically and/or diversify products
- Cultivating new markets, such as gas-to-liquids
- Maintaining margins through engineering and manufacturing operational efficiency improvements
- Maintaining a strong balance sheet through aggressive cash management

Investment Considerations

- Expected long-term global energy demand growth driving opportunities
- Leading market position and worldwide brand recognition
- Sales model based on early engineering involvement
- Expanding addressable market opportunities
- Strong and flexible balance sheet
- Acquisition opportunities
- Results-oriented management team
- Top quartile financial performance
- Solid operating leverage and powerful cash generation
